First, you will visit the Great Pyramid of Giza (also known as the Pyramid of Khufu or the Pyramid of Cheops ) is the oldest and largest of the pyramids in the Giza pyramid complex. It is the oldest of the Seven Wonders of the Ancient World, and the only one to remain largely intact.

The great pyramid was built as a tomb for the Fourth Dynasty Egyptian pharaoh Khufu and estimate that it was built in the 26th century BC during a period of around 27 years.

Initially standing at 146.5 metres (481 feet), the Great Pyramid was the tallest man-made structure in the world for more than 3,800 years. Throughout history, the majority of the smooth white limestone casing was removed, which lowered the pyramid's height to the present 138.5 metres. What is seen today is the underlying core structure. The base was measured to be about 230.3 metres (755.6 ft) square, giving a volume of roughly 2.6 million cubic metres (92 million cubic feet), which includes an internal hillock

Then we will visit the Pyramid of Chephren or Khafre. This is the second-tallest and second-largest of the 3 Ancient Egyptian Pyramids of Giza and the tomb of the Fourth-Dynasty pharaoh Khafre (Chephren), who ruled c. 2558?2532 BC

Then we will the Pyramid of Mykerinus.
